

CPD EVENT RECORD

FIRST AID IN THE CLINIC

with Steven Bruce and Malcolm Parnell

Live Event:
*Learning
With Others*

Summary

This event covered the syllabus required by the Health and Safety Executive for "Emergency First Aid at Work", and also included first aid for anaphylaxis, pneumothorax, diabetes and heart attack. Practical elements of the course, including CPR performed on a manikin, were supervised and critiqued via video link.

Objective Activity: None
Communication & Consent: Yes

Evaluation, Reflection and Impact on Practice

On reflection, I am reminded that many serious conditions could be mistaken for musculoskeletal problems, and there is an ever-present need in clinic to be ready to deal with a first-aid emergency. Because this course emphasised outcomes rather than dwelling on detailed procedures and lists of symptoms, I will feel more confident about administering treatment in these circumstances.

Confirmation

I confirm that this is an accurate reflection of my learning during this event.
