

CPD EVENT RECORD

NEO-NATAL FEEDING DIFFICULTIES

with Miranda Clayton

Live Event:
Learning
With Others

Summary

This discussion covered a variety of causes of feeding difficulties in babies including tongue ties and absent sucking reflexes, together with associated problems such as reflux and constipation.

An approach to treatment was outlined, and the difficulties in promoting osteopathic/chiropractic treatment explained.

Evaluation, Reflection and Impact on Practice *(this part of the certificate is **not** automatically generated - it has been entered by the participant)*

Not only was this a reminder of the potential benefits of manual therapy for infants, it was useful to hear the of the drawbacks of some conventional approaches, and the details of the relevant NICE Guidelines. This will help me offer accurate, evidence-based advice to patients. The reminder about ASA guidelines also helped remind me of the need for caution and accuracy in advertising
