

CPD EVENT RECORD

PILATES - THE "HOG"

with Speaker

Live Event:
Learning
With Others

Summary

This broadcast included a demonstration of how the "hog" can be used as a rehab aid in improving balance, with progressive levels of complexity/difficulty. The purpose of the exercises and safety considerations were made clear, as were the very few contraindications, such as osteoporosis (a relative contraindication). A key element was the extent to which patients could perform the exercises at home, unsupervised. Modifications were demonstrated to alter the muscle groups affected.

Evaluation, Reflection and Impact on Practice (this part of the certificate is **not** automatically generated - it has been entered by the participant)

This was a helpful insight into a range of techniques to help improve balance and stability, using simple, inexpensive equipment. It has provided a few new ideas for me to explore in advising patients on self-help rehab.
