

CPD EVENT RECORD

"LEAKY LADIES" - THE ROLE OF HYPOPRESSIVE BREATHING

with Nikki Scott and Claire Forrester

Live Event:
Learning
With Others

Summary

This discussion covered a wide range of obstetric-related issues, in particular stress incontinence, but also other concerns such as hernia or uterine prolapse.

A technique known as hypopressive breathing was explained and demonstrated and, to the extent possible, the evidence for its success was outlined.

The utility of this approach in male patients was also covered.

Evaluation, Reflection and Impact on Practice (this part of the certificate is **not** automatically generated - it has been entered by the participant)

This discussion has provided me with an option for treating certain post-partum problems, which is likely to be much more effective than standard care, as recommended in most healthcare settings. It leaves me better able to inform and advise patients.
