

CPD EVENT RECORD

MEDIAN NERVE ENTRAPMENT

with Simeon Niel-Asher, and Prof Bob Gerwin MD

Live Event:
Learning
With Others

Carpal Tunnel Syndrome, Pronator Teres Syndrome and Anterior Interosseous Syndrome were all covered within this discussion median nerve problems. Importantly, differential diagnostic criteria and the potential for a "double-crush" injury were explained.

Details of the relevant anatomy were provided and the relevance of special tests, including nerve conduction, outlined.

Evaluation, Reflection and Impact on Practice (this part of the certificate is **not** automatically generated - it has been entered by the participant)

It was really useful to be reminded of the detailed anatomy involved in median nerve problems, and to see some important differential criteria. It will help me address similar problems in my own patients, and I will consider the use of needling techniques where appropriate.
