

## Acupuncture for post Stroke Dysphagia

GV16, CV23, CV22, GB20, GB12, and TE17.

Wednesday 9 July 2025 1 hr learning with others live CPD

### Reflective learning

Really interesting Online meeting hosted by Mike Cummings Going through a paper which was written about post/swallowing disorders that have been treated by Acupuncture. Using the above needle points. The paper reported statistical evidence of improvements in different measures of swallowing. I do not see many stroke patients in my clinic but it was fascinating to listen to the points used and the positive results.
