

CPD EVENT RECORD

PELVIC GIRDLE PAIN - TREATING THE PREGNANT PATIENT

with Elisabeth Davidson MSc (Paeds), BSc(Chiro), DC, FRCC(Paeds)

Recording:
*Learning
by Oneself*

Summary

This discussion examined the nature of pelvic girdle pain and how treatment might need to be modified when dealing with a pregnant patient. Safety aspects were discussed, as well as practicalities relevant to managing patients in the later stages of pregnancy. A suggested case history template was shared, as was an example of an acceptable advertising flyer. The applicability of maintenance care, especially given the paucity of alternatives, was emphasised.

Chiropractic Code 2016
