## **CPD EVENT RECORD**

## PHYSICAL THERAPY FOR PERFORMING ARTISTS

with Laurence Kirk and Ashley Stafford

## **Summary**

This CPD concentrated on how the stresses, strains and repetitive patterns of performance can affect musicians and singers. It also delved into how physical therapy might enhance that performance. To demonstrate, the speakers used a live band comprising a singer and bassist/guitarist, explaining how postural modifications, exercise and therapeutic intervention could benefit them.

Evaluation, Reflection and Impact on Practice (this part of the certificate is not automatically generated - it has been entered by the participant)
