

# CPD EVENT RECORD

## Case-Based Discussion

Live Event:  
Learning  
With Others

This discussion used a number of cases as a vehicle for discussing more widely how to handle patients with cancer.

While it was emphasised that we should never imply that we can treat the disease, we should also be aware of the extent to which we can improve patients' quality of life through manual therapy, by addressing the indirect consequences of cancer, or the surgery which it might require.

We should also be aware of the psychological impact on families and friends, as well as sufferers, and be prepared to signpost accordingly.
