

CPD EVENT RECORD

Case-Based Discussion

Live Event:
Learning
With Others

Several cases were discussed, all with a neurological theme, including MS, MND and Parkinson's Disease. Differential diagnoses were explored and aspects of neurological testing considered. An important component of the discussion was the benefit that treatment might bring to quality of life. It was emphasised that a patient must fully understand the possible limitations of treatment, and that this should be documented. Consent to continue with palliative care should be regularly confirmed. However, an inability to cure a condition should not be taken as a contraindication to treatment.
