## CERVICAL SPINE MRI INTERPRETATION

with Rob Shanks and Darren Chandler

**Recording:**  
*Learning  
by Oneself*

### Evaluation, Reflection and Impact on Practice

#### Summary

This discussion covered the basic elements of cervical spine MRI interpretation - identifying anatomical landmarks and recognising possible pathology. The need to relate the scan findings with symptoms was emphasised, and illustrated by reference to a real case. The potential for radiologists to miss important findings was also made clear. Using a number of real cases, the presenters illustrated how treatment could be guided by the imagery.
