

CPD EVENT RECORD

MRI INTERPRETATION

with Robert Shanks and Darren Chandler

Recording:
*Learning
by Oneself*

Summary

This discussion explained the different types of MRI scanners and different scan types (T1, T2 and STIR). A number of cases were used to demonstrate the potential for significant findings to be overlooked by radiologists, particularly if the requirements of the scan were not stated accurately at the outset.

Evaluation, Reflection and Impact on Practice

On reflection, I can see that it is important that my own skills in interpreting the imagery are important, and that reliance on the radiologist's report alone might not be sufficient on some occasions. Equally, when requesting imagery, it is essential that I specify exactly what is required, and why.

Confirmation

I confirm that this is an accurate reflection of my learning during this event.
