

# CPD EVENT RECORD

## PAIN AND MYOFASCIAL RELEASE

with Ruth Duncan

**Recording:**  
*Learning  
by Oneself*

### Summary

This discussion concerned the role of myofascia in modulating pain responses. The possible mechanisms behind the effectiveness of myofascial treatment were covered, as was the idea that the fascia might have "memory" of trauma, including emotional stress. The bio-chemical processes involved in pain, adhesions, scar tissues were outlined and the effectiveness of different tools was examined.

### Chiropractic Code 2016

**A** Put the health interests of patients first

A1 A2 A3 A4 A5 A6 A7

**C1** C2 C3 C4 C5 C6

**D** Professionalism

D1 D2 D3 D4 D5 D6  
D7 D8 D9 D10 D11 D12

Objective Activity: None  
Communication & Consent: No

### Evaluation, Reflection and Impact on Practice

On reflection, this reinforces my knowledge of the role of fascia and has provided some useful sources of research, which might help my treatments. Overall, I am better able to explain to patients the role of fascia in their health.

### Confirmation

I confirm that this is an accurate reflection of my learning during this event.
