Evaluation, Reflection and Impact on Practice

Summary

This discussion covered the evidence, much of it very recent, for the connection between headaches and myofascial trigger points. Migraine, Tension Type Headaches and cervicogenic headaches were included, and possible mechanisms for formation of trigger points and production of symptoms were proposed. It was interesting to note that dry needling gave rise to similar relief compared with injection of anaesthetic. Contributory factors, such as iron deficiency, forward head posture, hypermobility and TMJ dysfunction were also discussed.

Reflection

Chiropractic Code 2016

A Put the health interests of patients first

A1 A2 A3 A4 A5 A6 A7

C Provide a good standard of clinical care and practice

C1 C2 C3 **C4** C5 **C6** C7 C8 C9

E Obtain informed consent for all aspects of patient care
