

CPD EVENT RECORD

PAIN SCIENCE AND MANUAL THERAPY

with Ulrik Sandström

Recording:
*Learning
by Oneself*

Summary

This discussion concerned the application of pain science to manual therapy, in particular the psychological component. Coping strategies, catastrophisation and kinesiophobia were discussed, as were techniques to demonstrate to a patient that it was their protective fear that was preventing movement, not a mechanical problem. The importance of language as a placebo and nocibo was emphasised.

Evaluation, Reflection and Impact on Practice

On reflection, there is much in this discussion that relates to my own patients and the strategies outlined will be useful in helping improve treatment outcomes.

Confirmation

I confirm that this is an accurate reflection of my learning during this event.
