Evaluation, Reflection and Impact on Practice

Summary

This discussion examined the importance of case history taking in assessing spinal problems and cautioned against over-reliance on imagery. The importance of good communication, both in eliciting information and in explaining problems, was stressed. Abnormal patient psychometrics were outlined and the possibility that these could mislead the practitioner explained. Rare but important conditions were illustrated and the importance of early referral of possible cauda equina cases was stressed.

Reflection

Chiropractic Code 2016

A Put the health interests of patients first
