

CPD EVENT RECORD

Strength, Conditioning and Rehab

with Dr Claire Minshull PhD

Recording:
*Learning
by Oneself*

Summary

This discussion looked at methods of encouraging patients to perform relevant exercise when they had limited access to gym equipment. It explored the science behind strength gains, and the evidence supporting muscle-strengthening in osteoarthritic pain relief. The limitations of some programmes, such as the NHS "Escape Pain" protocol were explained, and modifications needed for an older or more infirm patient were outlined.

Evaluation, Reflection and Impact on Practice

On reflection, the guidance offered here will be applicable to many of my patients. The suggestions for motivating patients to exercise are likely to help with compliance, and there were useful ideas that I can employ in telehealth consultations.

Confirmation

I confirm that this is an accurate reflection of my learning during this event.
